Stark USA UV-C POND PRESS BIO FILTER
MODEL 71015

Picture Assembly
Written by: Zachary Gebis (zacharygebis.com)
To ensure no leaks around seal place o-ring on around the upper portion of the filter bucket. The ring should fit snug.

Then place the filter assembly back into the bucket. Try to place it into the bucket so that the lid makes contact EVENLY around the entire bucket and press down.

If the ring is not snug and is very loose and dry/cracking, order a replacement ring!

(unit assembled without filter pads)
